

SPECIAL HOSTA SALE!

In support of our American Hosta Society Hosta Trail, we are offering six (6) distinct and different hostas, bare root, from Green Hill Farm and Bob Solberg. All proceeds will go toward the revitalization of the Hosta trail.

Your hosta order must be submitted and paid for at the May 2 Memphis Horticultural Society meeting and can be picked up at the June 6 meeting. Hostas will NOT be for sale at the Tucker Patio Garden Tour.

'Trophy Wife' - First time introduction. Very Large

I love hostas that jump out of the ground that are screaming yellow. New from Bob Fox, this hosta is not only a bright "spring yellow" it is a rare huge one. The sturdy rounded leaves are also ruffled with strong veins and yes, it does become greener in summer but that is what allows it to grow so big. **\$25**

'Golden Falls' (D. Ruff, Solberg 2018) - ('Niagara Falls' seedling) - Large, (24" X 36")

This large bright yellow seedling of 'Niagara Falls' from Doug Ruff has it all. It is an elegant combination of upright cascading long-pointed leaves, many deeply impressed veins flowing down, and tight ripples on the leaf edges. Even the large pale lavender flowers in summer are too pretty to remove early. A new classic. **\$25**

Gabriel's Wing' - Large

This is probably the best of the margined sports of 'Empress Wu'. Its huge blue leaves sport bright yellow margins in spring. It grows well and does best if given some bright light during the day. From Don Ralston, this hosta is a winner from winning lineage. **\$18**

'Alana's Laugh' - New Medium

One of the two new hostas from Heuchera hybridizer Dan Heims from his hosta hybridizing program emphasizing purple pigments and white wax. This waxy blue hosta has nicely ruffled leaves with purple petioles and sometimes some blue in the leaf. The leaves are light and airy and hold their blue color well. It is a different look. **\$20**

'Jaws' - Medium

Yes, we are bringing it back! 'Jaws' is not really a scary hosta although its green leaves do seem to have rows and rows of shark teeth. It makes a very well behaved clump in the garden especially if planted in half a day of sun. A "goodie" from Altera Scheer. **\$15**

'Effervescence' - NEW - Small

This bright yellow hosta from Dan Wols has great spring impact. As this hosta calls you to come closer you will appreciate the nice ruffling on its arching pointed leaves. A seedling of 'Marilyn Monroe' and 'Neptune', (where it gets its ruffling) and 'Designer Genes' (where it gets its yellow color). **\$20**

Your support is GREATLY APPRECIATED!
